Cockpit: 34 x 21

Hatches: 8" round forward, 17" oval aft

Weight: 39 lbs

Introducing the FUSION , new for 2006.

The Fusion is the latest in our great lineup of thermal formed kayaks. At 12'1" and sporting a 27" beam the Fusion is rock steady. The dual channel hull form allows for straight tracking without compromising maneuverability.

Unlike many rec kayaks the Fusion comes with 2 main storage compartments with bulkheads fore and aft and a 17" oval rear hatch and an 8" forward hatch. Soft rubber handles for carrying make it an easy and comfortable carry and load. Complete with ample deck rigging for external loads and enhanced lock up security from a beefy u-bolt on the foredeck.

Entry and exit are enhanced by a large cockpit and ample foredeck height. Ideal for fishing, photography and just about anything else the Fusion isn't just a pretty face but a great paddle as well. Straight tracking with a fine, fast entry and a long waterline that almost equals its LOA the Fusion will fill the bill for a couple of hours or a couple of days.

Adding to the appeal of this attractive package is an all in weight of just 39 lbs.

Rudder, flush deck rod holders or sail rig as available options
