## Specifications:

Length: 9' 7"  
Beam: 30"  
Depth: 16"  
Weight: 30 lbs

Standard: rear bulkhead with plate hatch, forward flotation

### Accessories:

Side hull 1/2 round foam floats for additional stability

Sailrig and rudder/foot tracks combination

The Enigma .....fishing, sailing, paddling about the bay ...the Enigma will handle it all with ease and flair.

The Enigma has a 30" beam on a 9'7" platform with a maximized waterline length for fast and stable performance. A depth of 16" at the forward end of the cockpit gives loads of legroom and a truly comfortable seating position even for large paddlers. The hull is lapstrake with an ample keel for exceptional stiffness, speed and tracking. The Enigma edges, turns and performs like a much longer touring kayak.

Made of thermal formed plastic the Enigma out performs other small rec kayaks in looks and weight as well. It has a glossy finish inside and out and weighs in at 30lbs..... easy to hoist and launch from other craft and tough enough to take it.

For those looking for additional stability while not paddling the Enigma can be fitted with foam half round hull bumpers that protect both the Enigma (or it's mothership when loading), and provide additional buoyancy at the rails for a stable fishing, bird watching or photography platform.

The Enigma can be rigged with a sail and rudder configuration for those days of summer where play is the order of the day.

Available in high impact Thermalform.

**Enigma ...you can have it all.**
